Welding Engineer

The EVAPCO Group, an American Company founded in 1976, is the leading supplier of Evaporative Cooling Products for the Air Conditioning, Industrial Process Cooling and Industrial Refrigeration Markets around the world. EVAPCO products are at present produced in 17 factories around the globe. The European Headquarters are located in Tongeren, Belgium.

Job Description

As a Welding Engineer at EVAPCO Europe, you will be responsible for developing, improving, and optimizing welding processes within our production operations.

You will work closely with both internal teams and external suppliers to ensure the quality, efficiency, and safety of welding activities.

Responsibilities

- Develop and implement welding procedures and specifications.
- Conduct quality checks and inspections on welding activities.
- Troubleshoot technical issues related to welding.
- Provide training to production employees on welding processes and techniques.
- Collaborate with design teams to enhance the weldability of product designs.
- Research new technologies and materials in the field of welding.

Requirements

- Bachelor's or Master degree in Mechanical Engineering, Materials Science, or a related field.
- Proven experience as a Welding Engineer or in a similar role.
- Experience with welding inspection and quality control systems.
- Strong analytical and problem-solving skills.
- Excellent communication skills and the ability to work effectively in a team environment.

What We Offer

A dynamic work environment within a growing company, opportunities for professional development and training. A competitive salary package with extra legal benefits

A collegial and supportive work culture.

Are you passionate about welding and do you have experience in optimizing welding processes?
